

## Press release

Aix-en-Provence, 5 September 2016

### **Move Expert consolidates its success in Europe with the Macron Law**

Since its establishment in 2012, the service company Move Expert has proven its great service standards among European road hauliers.

Active player in ferry-booking owing to its undisputed client relationships and association with shipping companies, Move Expert affirms its expertise and responsiveness with a new online portal for better management of the Macron Law.

Following the implementation on 1 July 2016 of Decree No. 2016-418 of 7 April 2016 concerning the posting of foreign drivers in France, Move Expert was able to create a comprehensive, multilingual and adaptive offer at the best quality-price ratio of the market in record time.

Using state-of-the-art information technology, Move Expert and Vatecure Fintech **launched a dedicated website, [www.macron-fr.eu](http://www.macron-fr.eu)** (info, FAQ, updates) as well as a responsive and informative web application <http://macron-fr.eu/> to help hauliers manage this new legal obligation in real time while simplifying their job (*Vatecure Fintech is a company of the Group which carries out development projects in the road transport sector (VAT, ferry-booking, Macron Law, etc.)*).

This platform is continuously evolving to adapt to the implementation of this regulation and keeps clients updated almost in real time with the situation and the risks associated with this new decree **in 11 languages**.

Lastly, Move Expert offers a “haulier friendly” pricing that is adapted to the size and requirement of the clients without excessively increasing the cost for road transport companies who are already tackling the urgency and complexity of this new regulation.

This responsiveness and service standard have led to several collaborations with renowned European transport associations (**FAI (Italy), MKFE (Hungary), ASTIC (Spain), ANTRAM (Portugal), ARTRI (Romania), MT (Serbia)** etc.) and the signing of contracts with leading international hauliers in Europe.

Today, more than 2000 road transport companies use these services everyday and trust Move Expert. The company now aims to offer this service in other countries when required.

This fits perfectly in Move Expert's strategy of online international development, combining a vast experience of 23 years amassed by Sébastien Schmitt and the integration of a software development company specialising in high-performance software. This is a prelude to the new online service offers with the creation of sector-specific applications.

#### **About Move Expert**

Move Expert is a company specialising in international road haulage services created in 2012 by Sébastien Schmitt, an industry expert for 23 years.

Following the acquisition of an established company RETURN TAX and its investment in FASTVAT, Move Expert offers today a wide range of services such as recovering and financing of VAT, ferry-booking, electronic toll badges and from now on representation for the Macron Law. It has also been able to gain the trust of numerous transport associations in Europe.

Move Expert is already present in the Czech Republic, Bulgaria and Romania as well as in most of the European countries thanks to its partners and has more than 2000 clients.
